

# Help CHS in AGA4 (GPUv6/MI355x)

## Process of Analysis

The team considered the perspective of an IC1 receiving the tickets listed below and whether that IC1 could execute on them based on the information in the tickets. The goal of the exercise is to have any CHS technician execute a repair with clear instructions.

	Avnish Content			CHS Content			
	Category	Ticket example	Notes	Details	Actionable by CHS (approved by CHS)	Valid runbook?	Actions
1	Card Management	<a href="https://jira-sd.mc1.oracleias.com/browse/DO-26144272?filter=384507">https://jira-sd.mc1.oracleias.com/browse/DO-26144272?filter=384507</a>  <a href="https://jira-sd.mc1.oracleias.com/browse/DO-26162092?filter=384507">https://jira-sd.mc1.oracleias.com/browse/DO-26162092?filter=384507</a>	Runbook link in description	Duplicate of line 4			Both Tickets here are S martnic wipe unable to find any DHCP offer. – Analyzing under that bucket.
2	Open Problems	<a href="https://jira-sd.mc1.oracleias.com/browse/DO-2605626">https://jira-sd.mc1.oracleias.com/browse/DO-2605626</a>	Runbook links in description Runbook : DCO ticket <a href="#">runbook</a> ARO Runbook:Url : <a href="#">runbook</a>	Open Problems tickets can come in a few ways.  1. TRS tickets that do not have a GRT match a. cut by TRS with "Generic open problems" in summary 2. Open problem tickets manually cut by various service teams. a. No real consistency across tickets and format 3. Multiple runbooks in the description of the ticket with no indication of which runbook should be followed. 4. Faults not prioritized 5. No requested physical action in the ticket. 6. No DCSE run book 7. <a href="#">BMP-825375 / DO-2605626</a> - was cut HoPS Proxy ticket. • Ticket was not cut by TRS, why?	No	No	<input type="checkbox"/> <a href="#">BMP-825375 / DO-2605626</a> has active ILOM faults and should have gone to TRS.  <input type="checkbox"/> Remove dependency on HoPS proxy tickets ( failed in lego action GpuTailnodePreProvisioning) needs a CHS run book

3	Card IP address doesn't match plan	<a href="https://jira-sd.mc1.oracleiaas.com/browse/DO-2625147">https://jira-sd.mc1.oracleiaas.com/browse/DO-2625147</a>	Instructions in ticket "Hi Team,  Please check and verify cross cabling for smartnics . Smartnic FPF253714F4 should not be visible.  "	IP connection on smartnics were incorrect.  <ul style="list-style-type: none"> <li>• CHS tech triaged the system to validate which cables were connected incorrectly and how they needed to be swapped.</li> <li>• The work the CHS tech did here should have been done prior to the ticket being cut.</li> <li>• All connection related tickets should include both endpoint port connection before cutting ticket to CHS</li> <li>• The CHS ticket should have said "smartnic cabling incorrect, please swap the cable endpoint of Serial   Elevation   Port with Serial   Elevation   Port and reach out to the requester to verify"</li> <li>• No actionable runbook for CHS</li> <li>• No Direct/ prescriptive physical request</li> <li>• No Published CHS runbook</li> </ul>	No	No	<input type="checkbox"/> Service Team to engage DCSO to create CHS authorized run book for this failure <a href="https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process">https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process</a>
4	SmartNicRot Wipe and open problems  OR  Smartnic wipe unable to find any DHCP offer	<a href="https://jira-sd.mc1.oracleiaas.com/browse/DO-2616171">https://jira-sd.mc1.oracleiaas.com/browse/DO-2616171</a> <a href="https://jira-sd.mc1.oracleiaas.com/browse/DO-2614127">https://jira-sd.mc1.oracleiaas.com/browse/DO-2614127</a>  <a href="https://jira-sd.mc1.oracleiaas.com/browse/DO-2616398">https://jira-sd.mc1.oracleiaas.com/browse/DO-2616398</a>	Instructions in description 1. Reseat the smartnics 2. Check if any card /cable is faulty 3. Powerdrain the host. 4. check/replace the wipe cable if needed 5. Verify the serial connectivity between rot and smartnic  Runbook : <a href="https://devops.oci.oraclecorp.com/runbooks/CRDMMGMT/card-management-ops/crdmgmt-check-tor">https://devops.oci.oraclecorp.com/runbooks/CRDMMGMT/card-management-ops/crdmgmt-check-tor</a> <a href="https://devops.oci.oraclecorp.com/runbooks/CRDMMGMT/card-management-ops/crdmgmt-check-rot-serial">https://devops.oci.oraclecorp.com/runbooks/CRDMMGMT/card-management-ops/crdmgmt-check-rot-serial</a>	Smartnic cannot receive DHCP request. Ticket suggest cabling issues.  <ul style="list-style-type: none"> <li>■ runbook link is CRDMMGMT devops runbook and not CHS approved documentation</li> <li>■ There is physical action plans for CHS in the ticket</li> <li>■ Linked runbook does have physical request, however they are not detailed enough <ul style="list-style-type: none"> <li>■ No Physical endpoints</li> <li>■ Generic request (check smartnics, check TOR, etc...)</li> </ul> </li> <li>■ CHS should not be doing triage steps that can be automated or performed by centralized teams. (Check ILOM open Problems, check smartnic presence)</li> <li>■ No actionable runbook for CHS</li> <li>■ No Direct/ prescriptive physical request</li> <li>■ No Published CHS runbook</li> </ul>	No	No	<input type="checkbox"/> Service Team to engage DCSO to create CHS authorized run book for this failure <a href="https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process">https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process</a>
5	Fix Open Problems	<a href="https://jira-sd.mc1.oracleiaas.com/browse/DO-2616570">https://jira-sd.mc1.oracleiaas.com/browse/DO-2616570</a>  <a href="https://jira-sd.mc1.oracleiaas.com/browse/DO-2622675">https://jira-sd.mc1.oracleiaas.com/browse/DO-2622675</a>	Is the expectation to follow the GRT for the open problem?  CHS docs have FMS failure handling link <a href="https://confluence.oraclecorp.com/confluence/display/DCKS/FMA+Code+Handling">https://confluence.oraclecorp.com/confluence/display/DCKS/FMA+Code+Handling</a> - does this apply?  Typically open problems are listed and CHS is asked to work on them.	Same issues as Row #3 above	Same issues as Row #3 above	Same issues as Row #3 above	Same issues as Row #3 above

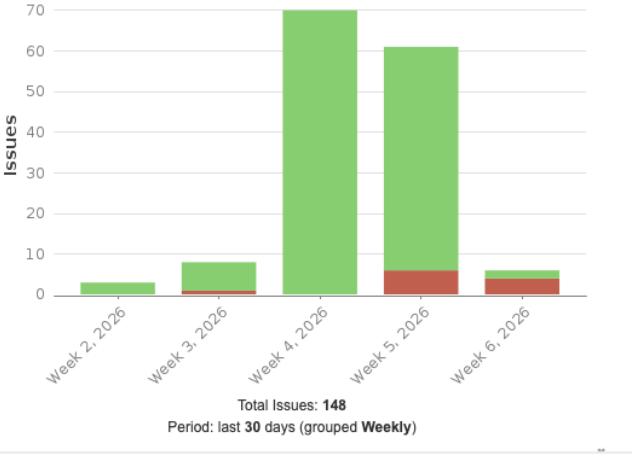

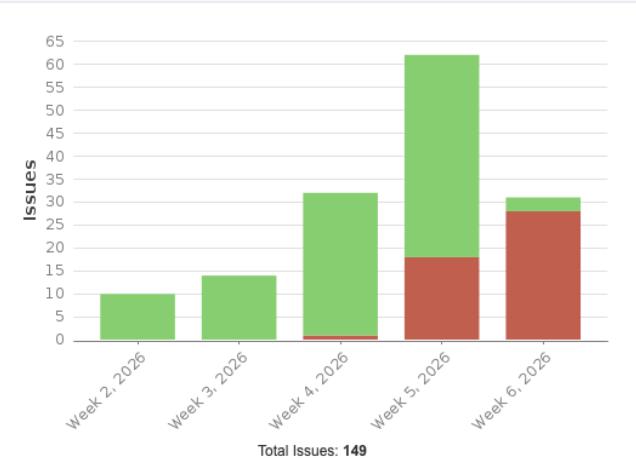

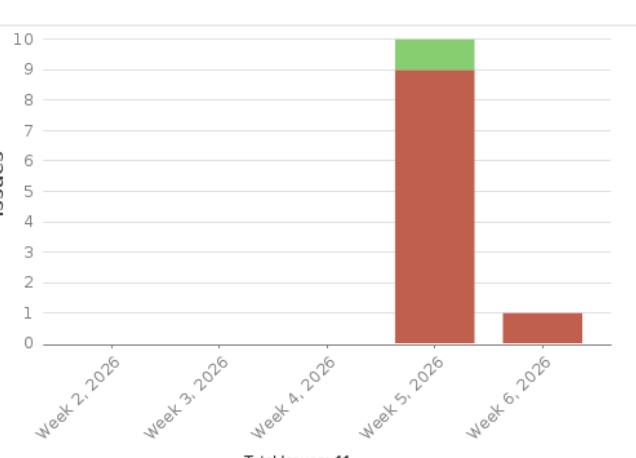

6	Cable Replacement	<a href="https://jira-sd.mc1.oracleias.com/browse/DO-2569753">https://jira-sd.mc1.oracleias.com/browse/DO-2569753</a>	<p>Tickets assumes CHS can debug link down , it provides reference docs and repair history link</p> <p>Link is hard down. Please troubleshoot.</p> <p>You may refer to the following documentation for assistance with link troubleshooting:</p> <ul style="list-style-type: none"> <li>DCO Rack Cabling Standards</li> <li>Troubleshooting AOC Link Connectivity</li> <li>Cable Installation</li> <li>Network and fiber testing</li> </ul> <p>Check the history for aga4-c1-b9-t2-r4 to aga4-c1-t3-c13-r4 DO link tickets here</p> <p>Open the following grafana link to review link status, light levels, temperature, etc over time. <a href="#">Grafana</a></p> <p>aga4-c1-b9-t2-r4 (s/n FGN245100AW) is located in Building aga4, Rack 3535, elevation 6 aga4-c1-t3-c13-r4 (s/n HBG24470L6S) is located in Building aga4, Rack 3912, elevation 11</p> <p>Note - the ports have been disabled.</p>	<ul style="list-style-type: none"> <li>Too much information unable to determine correct step quickly</li> <li>Not clear what steps should be followed and in what order</li> <li>Multiple CHS runvbooks provided. none apply <ul style="list-style-type: none"> <li>Runbooks provided don't match the connection type</li> </ul> </li> <li>Contradicting request <ul style="list-style-type: none"> <li>Summary says please request cable</li> <li>Description says "please troubleshoot"</li> </ul> </li> <li>Connection endpoints given are rarely the direct connection, they are either jump connection or breakout connections.</li> <li>CHS should not be asked to perform historical analysis or light level triage</li> <li>Eventually the ticket gives the connection points, but this should be the ONLY information provided.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;">       aga4-c1-b9-t2-r4 (s/n FGN245100AW) is located in Building aga4, Rack 3535, elevation 6 aga4-c1-t3-c13-r4 (s/n HBG24470L6S) is located in Building aga4, Rack 3912, elevation 11     </div>	No	No	<input type="checkbox"/> Service Team to engage DCSO to create CHS authorized run book for this failure <a href="https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process">https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process</a>
7	Link Down from CPV health check	<a href="https://jira-sd.mc1.oracleias.com/browse/DO-2616924">https://jira-sd.mc1.oracleias.com/browse/DO-2616924</a>	<p>Link is identified and CHS is asked to check why it is down. OR all links are down and open problems are listed.</p> <p>Unclear if CHS docs cover link debugging.</p>	<ul style="list-style-type: none"> <li>RDMA connection</li> <li>Missing if HN or TN</li> <li>OS information provided. CHS expected to translate to physical ports</li> <li>Generic Ticket Summary</li> <li>component item is set to hardware-gpu when the ticket looks to be link repair and should say network / link</li> <li>Physical port information not clear (nested in OS output)</li> <li>Manual ticket that should have been automated with information that CHS expects.</li> </ul>	No	No	<input type="checkbox"/> CPV root cause manual ticket creation <input type="checkbox"/> CPV to automate link source and destination physical info <input type="checkbox"/> CPV should use TRS/GRT recipes <input type="checkbox"/> CPV Team to engage DCSO to create CHS authorized run book for this failure <a href="https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process">https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process</a>

8	Health check v2	<a href="https://jira-sd.mc1.oracleias.com/browse/DO-2625265">https://jira-sd.mc1.oracleias.com/browse/DO-2625265</a>	"issue": "CDFP cable connection mismatch detected. GPU PCI addresses and module IDs do not match expected configuration", "sug gestion": "Verify CDFP cable connections between GPUs match the expected mapping. Check physical cable connections and GPU seating", "	<ul style="list-style-type: none"> <li>■ Initial request is generic "Health check is reporting to check CDFP cable connection" <ul style="list-style-type: none"> <li>■ What about the connection? Is it down?</li> <li>■ Expanded upon later in CPV outputs</li> </ul> </li> <li>■ No prescriptive physical request</li> <li>■ CPV should include expected port mapping</li> <li>■ Ticket summary needs to be more prescriptive</li> <li>■ CHS is expected to translate <ul style="list-style-type: none"> <li>■ "Please look into this"</li> </ul> </li>   <li>■ "Verify CDFP connections match the expected mapping" <ul style="list-style-type: none"> <li>■ what CDFP connection ? What expected mapping?</li> </ul> </li> </ul>	No	No	<input type="checkbox"/> CPV Team to engage DCSO to create CHS authorized run book for this failure  <input type="checkbox"/> SCO to verify if factory does PCI mapping validation at L10 testing
9	Power SHElf	<a href="https://jira-sd.mc1.oracleias.com/browse/DO-2571809">https://jira-sd.mc1.oracleias.com/browse/DO-2571809</a>	" check RU41 power shelf Right Lite ON. Failed PS1. Appears shelf RU41 has failed"	<ul style="list-style-type: none"> <li>• Ticket self created by CHS form visual inspection (floor walk)</li> <li>• Power shelves may not be monitored in OC1</li> </ul>	No	No	<input type="checkbox"/> Identify who owns power shelf monitoring? (pulse? DCIM?)  <input type="checkbox"/> Once owner is identified, automation needs created for these tickets.
10	Check and correct network connection per topology	<a href="https://jira-sd.mc1.oracleias.com/browse/DO-2600701">https://jira-sd.mc1.oracleias.com/browse/DO-2600701</a>	Please check below connection and correct it according to below topology. Correct connection: aga4-c1-nb64-t2-r7 <=> Ethernet23/1 <=>, aga4-c1-t3-c14-r7 <>. Ethernet21/1	<ul style="list-style-type: none"> <li>• Host names are provided instead of serials (CHS doesn't work off hostnames)</li> <li>• Summary and description don't match</li> <li>• No CHS approved run book provided</li> <li>• End points do not include full details (breakout)</li> <li>• Request in ticket is not clear - no clear action plan <ul style="list-style-type: none"> <li>◦ what does "correct" connection mean? Reseat/Replace</li> </ul> </li> </ul>	No	No	<input type="checkbox"/> Service Team to engage DCSO to create CHS authorized run book for this failure <a href="https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process">https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process</a>

11	Cable validation failures	<a href="https://jira-sd.mc1.oracleiaas.com/browse/DO-2612700">https://jira-sd.mc1.oracleiaas.com/browse/DO-2612700</a>	<p>Links that are not cabled to the correct switches (MAC/ipv6 address not found at all);</p> <p>aga4-c1-b15-t0-r4-u1-gpu-expander4, SLED1/PCIE1/1, aga4-q3-b38-t0-r1, Ethernet28/1 is empty. Check the link.</p> <p>aga4-c1-b15-t0-r4-u1-gpu-expander4, SLED1/PCIE2/1, aga4-q3-b38-t0-r2, Ethernet28/1 empty. Check the link.</p> <p>CHS/DO is authorized by Compute to work on this host in the allocated state in the holding pool with the CPV instance. This is a non-terminating repair.</p> <p><b>Compute Product Validation</b></p> <p><b>Job ID:</b> c0035613-a4ec-4898-9d29-0a954831bbe9</p> <p><b>Test Name:</b> cable_validation</p> <p><b>Asset ID:</b> 2539XK10CS</p> <p><b>Need help?</b>: Submit a ticket to the HPC queue</p>	<ul style="list-style-type: none"> <li>▪ Summary is generic - no indication of "what to do"</li> <li>▪ Description is not clear <ul style="list-style-type: none"> <li>▪ States cables are not cabled to the correct switches, but then suggest cables are "empty"</li> </ul> </li> <li>▪ No CHS approved run book provided</li> <li>▪ Host names provided instead of physical serial and elevations.</li> <li>▪ Direct port mapping</li> </ul>	No	No	<input type="checkbox"/> Service Team to engage DCSO to create CHS authorized run book for this failure <a href="https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process">https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process</a>
12	RDMA network connection unstable	<a href="https://jira-sd.mc1.oracleiaas.com/browse/DO-2616078">https://jira-sd.mc1.oracleiaas.com/browse/DO-2616078</a>	<p>BM.GPU.MI355X.8 2540XK101L is connected to chassis 2543KK105F. The following RDMA network interfaces are unstable going UP and DOWN. For each network cable serial number confirm there are no other associated tickets. Please <b>replace</b> the RDMA network cable connection(s) listed below and visually confirm there is link.</p> <p>If CDFP cabling was disconnected to perform this task, power cycle the host to confirm no open problems are present and all PCIE devices have trained.</p> <p>After performing this task please resolve this ticket to allow automated testing to resume.</p> <p>Engage OCIGNOC or CNE for assistance when repeated tickets have been cut for a network cable.</p>	<ul style="list-style-type: none"> <li>• Good initial prescriptive request</li> <li>• Host names provided instead of physical serial and elevations.</li> <li>• Information is over all good, but still confusing <ul style="list-style-type: none"> <li>◦ Could be consolidated and better for easier digestion</li> </ul> </li> <li>• CHS should not have perform ticket history analysis <ul style="list-style-type: none"> <li>◦ "For each network cable serial number confirm there are no other associated tickets"</li> </ul> </li> <li>• Ticket looks to have crossover information for other systems that don't apply here.</li> <li>• CHS should be owner of routing tickets to different after physical action completed <ul style="list-style-type: none"> <li>◦ "Engage OCIGNOC or CNE for assistance when repeated tickets have been cut for a network cable."</li> </ul> </li> <li>• No Approved CHS run-book in the ticket</li> <li>• CHS does not have training documentation on TRS/CPV (terminating vs non terminating) and how to interface with these tickets type.</li> </ul>	No	No	<input type="checkbox"/> Service Team to engage DCSO to create CHS authorized run book for this failure <a href="https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process">https://confluence.oci.oraclecorp.com/display/DCOps/DCGSE+Engagement+Process</a> <input type="checkbox"/> CHS needs trained on TRS service, ticket types and how to work them <input type="checkbox"/> CHS needs trained on CPV service, ticket types, and how to work them

13	Reseat or replace PSU	<a href="https://jira-sd.mc1.oracleias.com/browse/DO-2599694">https://jira-sd.mc1.oracleias.com/browse/DO-2599694</a>	<p><b>Please reseat</b> the broken headnode component(s): PSU</p> <p><b>DCO Actions</b> Reseat / Replace PSUs <a href="https://confluence.oci.oraclecorp.com/x/11cYzw">https://confluence.oci.oraclecorp.com/x/11cYzw</a> <a href="https://confluence.oci.oraclecorp.com/confluence/x/0IMvJAM">https://confluence.oci.oraclecorp.com/confluence/x/0IMvJAM</a></p> <p><b>Special Instructions</b> power supplies are unable to provide sufficient power to the system reseat all PSUs and install a PSU in any locations that are missing one. Replace any PSU reporting as failed</p>	<ul style="list-style-type: none"> <li>• TRS ticket</li> <li>• Action plan is clear and prescriptive</li> <li>• Description doesn't specify what to do after the action</li> <li>• Indicates to create an RHS ticket if you have problems doesn't align with the TRS process</li> </ul>	Yes	Yes	<input type="checkbox"/> CHS needs trained on TRS service. ticket types and how to work them  <input type="checkbox"/> TRS needs to update ticket description to be more clear on how to work the ticket (aka resolve ticket and TRS will validate, etc..)
